Experience

Develop for Good — QPAD Connect **May 2026 – Aug 2026**
Product Design Manager

- Led product discovery and MVP scoping for QPAD Connect, a 0→1 community mobile app for 1,500+ residents, translating user needs and client priorities into PRDs, user stories, and a development-ready backlog.
- Guided a 6-person design team in narrowing 11 proposed features to 5 for the MVP, prioritizing by client needs and technical constraints to deliver a focused, buildable scope.
- Raised resource-finding task success from 38% to 88% through comparative usability testing with 8 participants, introducing a dedicated discover page.
- Delivered the final MVP specifications and design handoff to the development team.

Develop for Good — KinFinity **Oct 2025 – Feb 2026**
Product Designer

- Defined and designed 5 core features, a brand system, and a developer-ready handoff for KinFinity, a 0→1 reunion-planning website for Black American families, handed off to the development team.
- Rescoped the product from a partner-platform mobile app to a standalone responsive website when integration constraints changed, preserving all 5 core features and essential user workflows.
- Turned 10 user interview findings into feature requirements and early product strategy direction for family reunion planning.
- Ran 6 rounds of preference testing with 4 participants and WCAG accessibility scans, then resolved 3 accessibility barriers.

Tech Fleet — Agents of Influence **Oct 2025 – Feb 2026**
Product Strategist

- Collaborated with the team to translate user survey insights into SEO keyword strategies, optimizing 30+ keywords around user needs and search intent, contributing to a 24% increase in organic website traffic.
- Audited 10 key web pages and prioritized 9 navigation and conversion barriers. User registrations rose 17% after the recommendations were implemented.

Projects

PadPal **Aug 2025 – Present**
Product Designer

- Led design and co-defined product direction with a software engineer to launch PadPal, a live 0→1 roommate-matching platform, defining preference-based matching and identity-verification requirements and onboarding 20 users.
- Raised onboarding completion from 65% to 82% by analyzing early user drop-off points and redesigning the preference survey, profile setup, and authentication flow.

Education

University of California, Irvine **Expected September 2027**
Master of Human-Computer Interaction and Design (MHCID)
Inclusive Excellence Fellowship Recipient ($15,000)
